

Professional Bio

Gregsby P. Gibbs
Microsoft Certified
Professional
gregsby@gmail.com

Gregsby Gibbs graduated from Auburn University with a bachelor's degree in Management of Information Systems in 1999.

Even though he graduated in 1999, his experience with computers goes back to 1991 when his family got their first computer. The computer had a 16 color screen and a 10 MB hard drive. He quickly got to work, learning the "ins" and "outs" of the computer.

It was through trial and error that Gregsby learned the most about his computer. He started with his first computer which was loaded with Windows 3.0. As times changed he stepped up to Windows 3.1, Windows 95, Windows 98 and then Windows XP. All along he was learning how to use the software and learning how to make it do what he wanted it to do.

In college, he successfully ran a hosting server and sold space on the server to other college students. After college, he started designing websites and was drawn to backend data processing. He became proficient at learning how to use Microsoft Office (i.e., Word, Excel, PowerPoint and Access).

He also has knowledge of Apples OS 10 and uses programs such as iPhoto and Lightroom to share photos with relatives who live out of state.

He continues to operate a web hosting business by outsourcing the hardware components to a company in Kentucky. The software part of the business is done in his spare time.

Gregsby lives in Chattanooga with his Wife Katie Willingham Gibbs and their beautiful daughter Emeline.

Skills

Microsoft XP – Microsoft Sever 2004 – Microsoft Windows 98
Microsoft Word – Microsoft Excel – Microsoft PowerPoint
Microsoft Publisher – Microsoft Access – Microsoft Outlook 2003
Adobe Professional 7.0 – Adobe Lightroom - Macromedia Fireworks
iTunes – Google Web Technologies – FTP – Web Site Hosting
